What's the Stats on Hawaiian Kine Grinds?

Product Explanation Sheet

Name: __________________________  Date: __________________

Product: Conduct a Food survey and graph your results.

*Read all steps before starting.*

You’re getting hungry and you want your friends to come eat with you. You need your friends’ help to decide what you want to eat. Survey your class. Ask them what their favorite local food is and tally your answers. When you’re done, create a simple graph of your results. It’s time to kau kau!

Follow the four steps to a successful survey:

1. **Create the questions**
   1. Use the Food Tally Chart you printed from step 10 of this WebQuest
   2. Choose six Hawaiian foods to fill in the Tally Chart. You can use foods from Step 11 or some of your own favorites.

2. **Ask the questions**
   3. Ask 10-15 of your classmates to choose their one favorite food from your list.
   4. Record their response on the Food Tally Chart.

3. **Tally the results**
   5. Total your results on the Food Tally Chart.

4. **Present the results**
   6. Create a bar graph from your data using grid paper or online with the websites provided on step 12 of the Steps page.
   7. Review the evaluation rubric to see how you will be evaluated.
